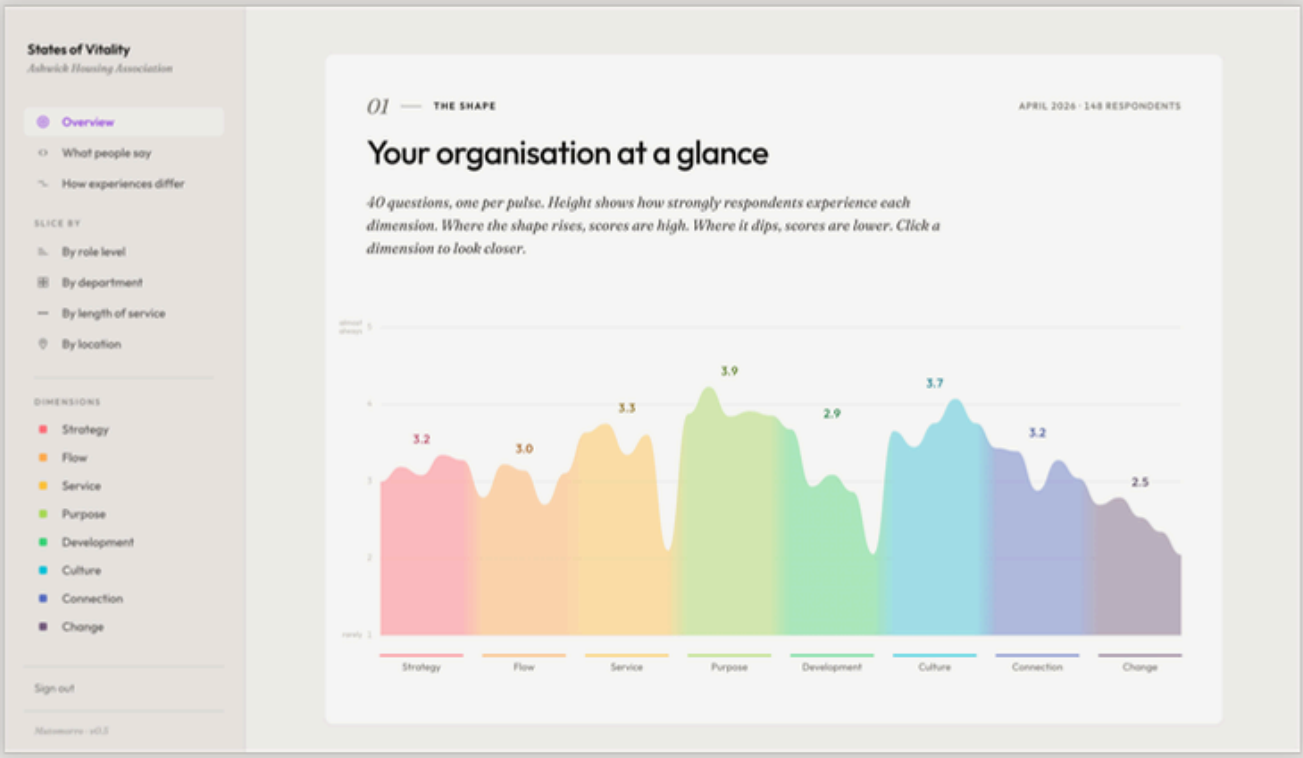
States of Vitality

See your whole organisation clearly

A comprehensive assessment that measures the health of your organisation across eight critical areas - revealing not just individual scores, but how everything connects.

Understand where your people are thriving, where experiences differ across the organisation, and where focused attention will create the greatest impact.



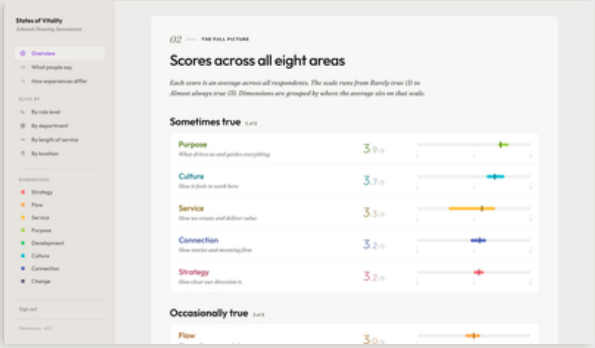
40 QUESTIONS ACROSS 8 DIMENSIONS. EVERY VOICE HEARD. ONE CONNECTED PICTURE.

What the dashboard reveals

A comprehensive picture of organisational health - where scores are highest, where they are lowest, and how strongly people agree or disagree. How experiences differ across seniority levels, departments, and length of service. And what people wrote in their own words when given the space to say what matters most.

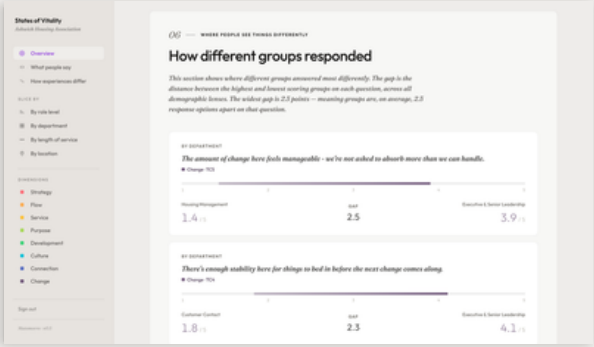
The shape of your organisation

Height shows how strongly each dimension is experienced. Peaks and dips reveal where energy is flowing - and where it is not. Click any dimension to explore the five questions underneath.



Where groups see things differently

The same question, asked to everyone, often reveals sharply different experiences across seniority levels, departments, or length of service. These gaps are where the real insight lives.



Eight dimensions. One connected picture.

We examine eight areas that are critical to organisational health and the welfare of the people within it. Each dimension is assessed through five carefully designed questions - 40 in total.

- **Strategy** — How clear our direction is.
- **Flow** — How easily we get work done.
- **Service** — How we create and deliver value.
- **Purpose** — What drives and guides us.
- **Development** — How we grow and build people.
- **Culture** — How it feels to work here.
- **Connection** — How stories and meaning flow.
- **Change** — How we adapt and evolve.

How it works

01 We set up your assessment

We configure your survey with your organisation structure - departments, role levels, locations. You receive a unique access code to share with your team.

02 Your people respond

The survey takes about 20 minutes. Responses are completely anonymous. Every question uses the same simple scale: how true is this in your experience?

03 We publish your dashboard

Once responses are in, we publish your interactive dashboard. Your leadership team gets secure access to explore the results at their own pace.

04 We help you make sense of it

An optional guided walkthrough helps you read the shape, understand the patterns, and identify where focused attention will have the most impact.

What every assessment includes

Configured survey tailored to your organisation structure
Interactive results dashboard with secure access for your team
Freeform response capture - hear what people say in their own words
Demographic analysis across role level, department, tenure, and location
